

Audouin's Gull – *Larus audouinii*

A quick explanation here. I didn't read this ring until I got back to the UK. I couldn't decide whether it was IAW or MV1?

Details from the ringing project confirmed it as MV1, the other code was unknown. Just another example of the benefits of digital imaging and associated technology.

White CR with Black MVI Ringing Centre Icona Ring number 6-069879
Species Audouin's Gull (Larus audouinii) Sex X Age Pulli Date 22.06.1994
Place Isla Des Fonoll PM Co-ordinates 39.20N – 00.20E

Re-sightings history

<i>Date</i>	<i>Locality</i>	<i>Co-ordinates</i>	<i>Recorder</i>
13.06.2007	Port de Pollensa – Mallorca	39.52N – 03.01E	Dylan Wrathall

NB. The first reported sighting of this bird, since ringing! How many birders have visited Mallorca in the last 13 years?
