Sighting History

27 - 29.06.2005
ENGLAND51.21 N - 01.25 E

Dumpton (garden), Kent,
Dylan Wrathall

15 days since ringing & a distance of 16km

Arrived during a period of large-scale Starling movement and remained around the area for three days, making regular visits to my garden feeding station. Particularly fond of the fat balls! Ring details were read through my telescope, confirmed by the wonders of digital imaging and my Nikon CP 4300.
