

## Barn Owl Ring Details 21<sup>st</sup> February 2004

On the 3rd December 2003 on the A257 Roundabout at Sandwich to Ash a Barn Owl was involved in a car accident, later after veterinary treatment, sadly the bird died. The ring details were forwarded to the BTO and we have just received their reply today:

**This Barn Owl was ringed, as a nestling, at Hellingly, Sussex on 16th July 2003 by P.J. Wilkinson. It has travelled 85 km from its nest site.**

A sad end to one of the most beautiful Native Owls, however with the hard work that Ringers do all over the world, we can at least put some information up about the bird's life, short that it was.

We at [www.planetth.net.org](http://www.planetth.net.org) would like to thank all the people that assisted in the chain, with the resolve of helping to bring you this report.
