

This is a summary of the data received from Nils Helge Lorentzen, the coordinator of the Lista Ringing Group, Stavanger, NORWAY.

Great Black-backed Gull (*Larus marinus*) Ringed, as a nestling, by Runar Jabekk on 22.06.2002 at Langoy, Mandal, Vest-Agder, NORWAY.

Blue Darvic - White J9G6 on left leg, metal ring 389836 on right leg.

Found in Ramsgate Harbour on 24.11.2003 (still present on 25.11) 520 days after ringing and the first reported sighting.

A nice bit of information that adds yet another dimension to looking at common species around Thanet!
