

Hoffield Common 15/07/04

Mothing Field Trip using 1Robinson trap with 125 MV light

We tried Hoffield for a few specialised Heath land bits' and pieces - though unfortunately none of them materialised! The expected and ideal Hot humid night rather typically didn't really come to fruition - a stiff breeze in the early evening putting paid to any of that. Still lots of moths - though not any of the ones we were after. Highlights were: lots of True Lovers Knot, an extremely worn Green Arches and a couple of Ling Pugs. A rather large Hornet went into one of the traps just after dark.

Thursday July 15th 2004
