

Kingsdown Beach

Mothing Field Trip using 1Robinson trap with 125 MV light

Wednesday July 14th 2004

Time: 21.00-04.45hrs

Observer: (FS & PM)

A relatively disappointing night

Given the high temperatures, which held up all night.

3 Evergestis Limbata (normally a very rare migrant) on a night with no other migrants suggest local breeding after a good year for migrants in 2003. List below with estimated counts of the more interesting bits n' pieces:

Caloptilia Rufipinella

Hawthorn Moth

Diamond Back - 1

Brown House Moth

Spindle Ermine

Orchard Ermine

Adaina Microdactyla

20 Plume Moth

Carcina Quercana

Chrysoteuchia Culmella

Scoparia Subfusca

Scoparia Pyralella

Scoparia Ambigualis

Eudonia Pallida

Pyrausta Aurata

Pyrausta Dispicata

Perinephella Lancealis

Phlyctaenia Coronata

Orthopygia Glaucinalis

Udea Prunalis

Gold Triangle

Thistla Ermine

Phycita Roborella

Bee Moth

Endotricha Flammealis

Mother Of Pearl

Homeosoma Sinuella

Conobathra Repandana

Trachysera Marmorea

Evergestis Limbata = 3

Agapeta Hamana
Agapeta Zoegana = 3
