

## Kingsdown Beach

### Mothing Field Trip using 1Robinson trap with 125 MV light

Monday 14th June 2004

Time: 21.45 -04.00 hrs

Observer: (FS & PM)

A sweltering evening inland - though much cooler and a lot damper when we arrived on the coast unfortunately.

All in all a reasonably unspectacular night  
(by Kingsdown standards)

though the Evergestis Limbata was  
a surprise - still a bit of a rarity.

#### TORTRIXES:

Aethes Beatricella  
Eupocillia Angustana  
Celypha Lacunana  
Celypha Cespitana c100  
Celypha Striana  
Eucosma Cana  
Lozotaenia Forsterana  
Lathronympha Strigana  
Light Brown Apple Moth  
Green Oak tortrix  
Cochylis Atricapitana  
Cochylis Hybridella  
Pandemis Cerasana  
Epiblema Cynosbatella  
Epiblema Roborana  
Epiblema Trimaculana  
Endothenia Gentianaeana  
Pseudargyrotoza Conwagana  
Hedya Nubiferana  
Bramble Shoot Moth  
TO CHECK = Giberifera Simplana (No.340 in book?)

#### Pyralids:

Chrysoteuchia Culmella  
Crambus Lathoniellus  
Agriphila Straminella  
Agriphila Tristella  
Schoenobius Gigantella  
Eudonia Pallida  
Scoparia Pyrallela

Homeosoma Sinuella  
Udea Olivalis  
Evergestis Limbata (rarity)  
Bee Moth  
Nephopterix Angustella = 2  
Ephistia Parasitella

OTHER MICRO'S:  
Diamond Backed Moth  
White Shouldered House Moth  
Elachista Argentella
