

Swanton Lane

Mothing Field Trip using 1 Skinners trap with 125 MV light

Thursday 1st April 2004

Time: 20.10 - 21.30 hrs

Observer: (Dylan & Gadget)

We had our first session in the woods this year and went to a spot along Swanton Lane where we have enjoyed some good mothing in the past. Although the temperature remained well above freezing, clearing skies and a bright moon did nothing to help our cause. At least we've made a start.

Common Quaker 8, Early Thorn 9, Engrailed 9, Chestnut 2, E. monodactyla 1, White-spotted Pug 1, Shoulder Stripe 2, Early Tooth-striped, Pale Pinion 1, Brindled Pug 3 & Twin-spotted Quaker 1 *Diurnea fagella* 1
